

T-Scan Upgrade for FC6000

OVERVIEW

T-Scan is a cost-effective entry to POS for those sites where the size of the operation does not justify high-end POS packages, but where the need to maintain automated control over inventory items and margins is essential. T-Scan incorporates the functionality of the FC6000 Forecourt Controller and expands the capability to manage 2500 barcoded dry stock items.

T-Scan is supplied with TransPLU software, which incorporates daily management of the inventory and storage of the product bar code PLUs. The system can be used in a single site configuration or can be a multi-site network controlled from a head office. Centralised control of stock items and pricing provides assistance with overall management of the sites. T-Scan offers you an affordable replacement for many legacy POS platforms, which are no longer supported, whilst providing much of the functionality available in the high-end POS packages.

BENEFITS

- Lower purchase and support cost than comparable products
- Flexible configuration ensures system matches your operating requirements
- Integrates with TT Outdoor Payment Terminals
- Simple operation and reliable embedded technology delivers minimal downtime
- Incorporation of POS and Forecourt Control in one unit provides cost-effective outcome

FEATURES

- National Measurement Institute (NMI) approval number S422
- Operates on the reliable embedded FC6000 platform, thus avoiding the need for a PC and associated difficulties
- Supports up to 2500 PLUs, 20 Departments and manual barcodes/PLU entry
- Field support possible via PSTN, NextG, Ethernet communications including software updates
- The operation is simple and user-friendly
- Accepts 25000 local cards at the terminal
- Provides shift end cash drawer reconciliation, can display last 500 transactions, allows receipt reprint and on demand receipts, accepts payment vouchers and multiple discounts.
- Full data download to TransPLU for back office interfacing and PLU management
- Can accept up to 19 customised methods of payment
- Full site reconciliation for both wet and dry stock items
